

AIR 1 radio is a positive radio station. It serves me because I have something that I enjoy listening to, and it helps keep me calm while on the roads in traffic before and after work. If Air 1 were displaced by LPFM broadcaster, I would be very disappointed and would have trouble finding a station that I actually want to listen to. The local community would be affected negatively because there are a lot people who listen to this station in California, and it teaches a positive message to help people in the community and not just to help yourself. Specially they have features that teach about how to help the homeless. This station is in the benefit of public interest because it provides music and uplifts, rather than music that promotes drugs, sex, or profanity. Even more it recommends better marriages, families and communities all which benefit the community. Thank for your time reading my comment.
